Career Objectives:

Business Intelligence Engineer with an Electrical Engineering background, bringing a systematic approach to turning raw data into meaningful insights. Skilled in developing data models, preparing datasets for analysis, and creating reporting solutions that enable effective business monitoring. Focused on ensuring data accuracy and clarity to support strategic and operational decision-making.

Experience:

Freelance Power BI Developer | Saudi Arabian Government

Sep 2026

- Built a multi-page Power BI dashboard for a Saudi government entity covering land use, housing, population density and urban development metrics.

Freelance Power BI Developer | Lensware Company

May 2026

- Resolved issues in the existing Power BI data model to improve accuracy and performance.
 - Modified and enhanced dashboard visuals to better reflect business insights.
 - Optimized data relationships and measures for more reliable reporting.
-

Internships:

Power BI Development – ITI (Information Technology Institute), Tanta

Jan 2026 – May 2026

Microsoft Data Engineer – DEPI (Digital Egypt Pioneer Innovation), Alexandria

Apr 2024 – Oct 2024

CCNA – NTI (National Telecommunication Institute), Alexandria

Education:

Bachelor of Electrical Engineering

2020 – 2025

Alexandria University, Egypt

- Graduation Project: Fast Off-Board DC Fast Charging System | Grade: A
-

Projects:

Financial Data Platform & AI Analytics System | ITI Graduation Project – Team Leader

- Built an end-to-end financial data platform using Azure SQL, Microsoft Fabric, Power BI, and Python.
- Designed a Data Warehouse and developed ETL pipelines with incremental data loading.
- Developed an XGBoost-based loan risk prediction model deployed via FastAPI on Azure.
- Implemented a RAG-powered AI assistant that converts natural language into SQL queries and visual insights.
- Created interactive Power BI dashboards and SSRS reports for business and financial analytics.

Tech Stack: SQL Server, Azure SQL, Microsoft Fabric, Power BI, SSRS, Python, FastAPI, PowerApps, RAG, LLMs.

Restaurant Chain Performance Analytics | Databricks, Spark SQL, Delta Lake, Power BI, DAX

- Processed 1.5 GB+ of data (11M records) using Spark and Delta Lake.
- Integrated multiple CSV/JSON sources into a unified dataset with ETL pipelines.
- Created KPIs (profit %, hourly trends) using Spark SQL.
- Delivered Power BI dashboard for revenue and branch performance analysis.

Gravity Books Data Warehouse | SQL Server, T-SQL, Kimball Methodology

- Designed a data warehouse using Kimball methodology (9 dimensions, 2 facts).
- Transformed OLTP data into a scalable Galaxy Schema.
- Built ETL pipelines and handled many-to-many relationships.

Wuzzuf Jobs Scraping & Analysis | Python, Pandas, Web Scraping

- Scraped and processed 50K+ job postings using Python.
- Cleaned and transformed data into structured analytical features.

Telecom Data Integration Pipeline | SSIS, SQL Server, ETL

- Developed an SSIS-based ETL pipeline to ingest and process telecom transaction data from CSV sources into a SQL Server data warehouse.
- Automated data transformations, validation rules, and audit logging to ensure source-to-target data traceability and quality.

Executive BI Dashboard | Tableau, Data Visualization

- Designed 4 interactive Tableau dashboards consolidating multi-dimensional business KPIs for non-technical executives.
- Applied calculated fields, filters, and visual best practices to surface performance trends and support data-driven decision-making.

Technical Skills:

- **Databases & Data Warehousing:** SQL Server, T-SQL, PostgreSQL, MongoDB, Dimensional Modeling, Data Warehousing
- **BI & Analytics:** Power BI, DAX, Power Query, Tableau, SSRS, Excel
- **ETL & Data Engineering:** SSIS, Apache Airflow, ETL/ELT, Data Pipelines
- **Programming:** Python, Pandas, NumPy, Matplotlib, Beautiful Soup
- **Big Data & Cloud:** Microsoft Fabric, Databricks, Spark, Azure, Docker, Linux
- **Other:** Generative AI, Agile, Software Testing, CCNA Networking

Certificates:

DP-700: Microsoft Certified Fabric Data Engineer Associate	<i>Microsoft</i>
Certified Data Engineer (SQL & Python)	<i>DataCamp</i>

Courses:

Data Engineering for Beginners: Python, SQL & Airflow	<i>Kiwilytics</i> 12 hrs
Microsoft SQL Developer	<i>MaharaTech</i> 32 hrs
Ubuntu Linux Essentials	<i>MaharaTech</i> 8 hrs
Data Analyst in Databricks	<i>DataCamp</i> 28 hrs
Building a Modern Data Warehouse - Data Engineering Bootcamp	<i>Udemy</i> 7 hrs

Languages:

- Arabic – Native
- English – Conversational (B1)
